You can always find the latest version here: https://www.bedag.ch/de/services/data-center-services/

- [1)] Customer tests are always requested after the maintenance windows. We will ask you by e-mail before the maintenance window to test your services operated by Bedag under realistic working conditions. Thank you for your understanding and your valuable cooperation.
- [2)] There is a strict change stop one working day before the maintenance window and one working day after the maintenance window. No orders are accepted or executed.
- [3)] Data center infrastructure maintenance: IT services remain available, please do not plan any changes. Applies mainly to our housing customers.
- [4)] Time changeover from summer to standard time. Interruption only for mainframe applications: (CICS, DB2, OpCon). No interruption for Windows, Linux and SAP systems.

Further Maintenance dates

- Mainframe: Further interruptions on mainframe partitions on demand every second Wednesday evening (even week numbers) between 19:00 and 23:00 CET.
- Open systems; Production: If required from 19:00 CET. (e.g. for the installation of urgent security patches)
- Open systems; testing/development: On demand every Tuesday evening from 17:00 CET.
